Available: **January-June 2018**

## Education

---

**Northeastern University**, Boston, MA Sept. 2014 - Present  
College of Computer and Information Science **GPA: 3.81/4.0**  
*Candidate for a Bachelor of Computer Science, minor in Mathematics* 2019

**Related Courses:** Algorithms and Data, Computer Systems, Object-Oriented Design, Human Computer Interaction, Software Development, Database Design, Theory of Computation, Linear Algebra, Logic and Computation, and Discrete Structures

*Honors:* Dean's List

*Activities:* Ultimate Frisbee

## Computer Knowledge

---

*Languages:* Node, Java, Python, HTML, Lisp, Familiar with: Swift, C++

*Systems:* Amazon Web Services, Windows XP/7/8/10, Linux, iOS, Mac OS, Android

*Software:* Git, Express, Docker, Jest, Selenium, Mocha, JUnit, Maven, IntelliJ, Electron, Cordova

*Other:* Customer interviews, usability testing, built arcade machine, built multiple computers

## Related Work Experience

---

**Asyncy**, Amsterdam, Netherlands Jan. - Present

*Software Developer Co-op*

- Architected multiple [sample apps](#) using StoryScript to show off Asyncy's main features/benefits
- Designed a handful of [microservices](#) using Docker from Slack-Bot to Elasticsearch containers
- Developed [CLI](#) for Microservice.Guide (new standard for creating and deploying microservices)
- Aided in DSL discussions for creation of StoryScript (language for choreographing microservices)

**Intuit**, San Diego, CA Jan. - July 2017

*Software Developer Co-op*

- Worked on TestEasy, from usability tests to deploying on AWS, using React, Java, MySQL, and CloudFormation with 100% code coverage and UI automation tests
- Mentored next group of incoming interns rotating on to the TestEasy team
- Launched two tools, Codecov and HipTest, on AWS using docker images, RDS, and CloudFormation
- Lead for TurboPulse, third runner up project during one week hackathon across all of Intuit

**Analytical Graphics Inc**, Exton, PA Jan. - June 2016

*Software Developer Co-op*

- Closed 34 issues for Cesium which included adding new features and improving existing code
- Utilized GitHub's API to create repository backups and let users save and share Sandcastle code samples
- Crafted code samples and blog post using the latest JavaScript frameworks to stimulate the Cesium community

## Projects

---

**Viibe** - <http://viibe.fm> In development

*Co-founder/Backend Developer*

- Designing a commutative playlist for music using Spotify's API on native iOS and Android
- Implemented a backed in Node.js, Express, Redis, MySQL, and Elasticserach deployed on Heroku
- Creating a playback algorithm to determinate what song to play next based on past music, current music, and frequency

**Miscord** Jan. - June 2016

*Designer/Developer*

- Strengthened Git and GitHub skills using Travis CI and Amazon Web Services
- Developed a bot for Discord using a Node.js wrapper for the Discord REST API
- Implemented design patterns including callbacks, Promises

## Interests

---

Surfing, Tae Kwon Do, exercise, astronomy, hiking, neural networks, blockchain, game development
